

IZH-35M MAGAZINE FIT

To fit the magazine of IZH-35M, first, insert the magazine into frame. About fifty per cent of new magazines will be not caught by magazine catch. To provide the magazine fixing you need to file the surface C of the magazine. Then you need to control position of the surfaces A of the magazine relatively the surface B of the pistol frame. It is acceptable if the surface A will be lower the surface B no more than 0.4 millimeter or 0.0157 inch. (On the drawing the surface A is higher than surface B).
